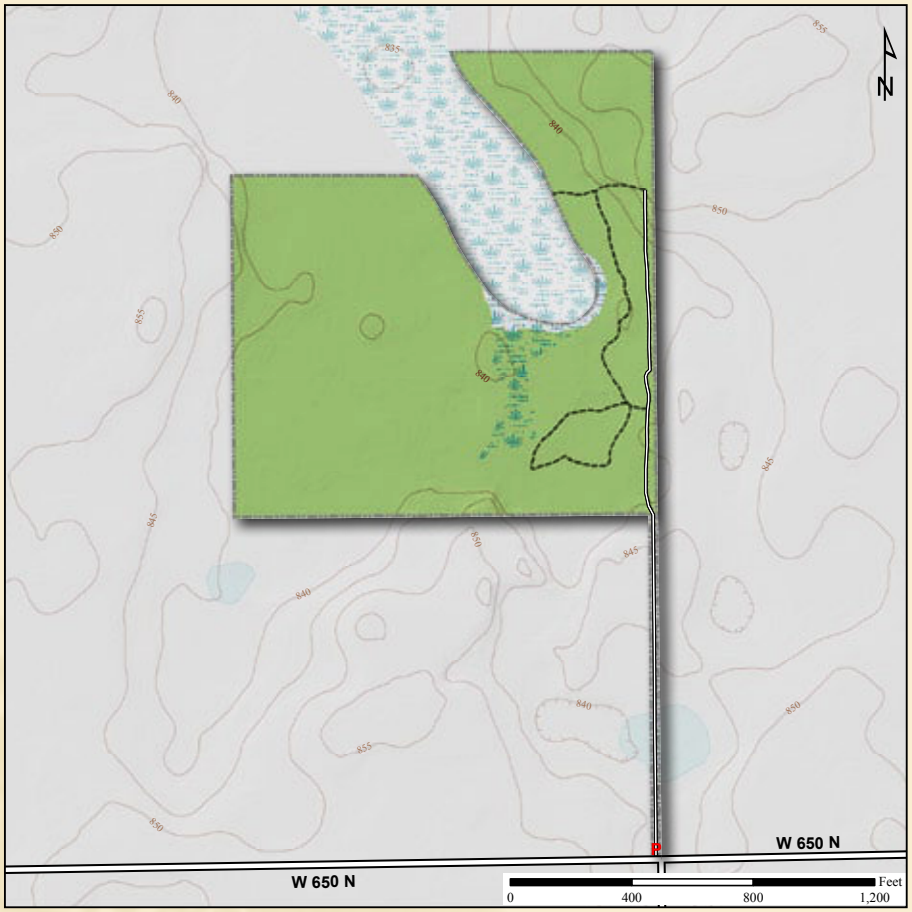
Glennwood Nature Preserve

TRAIL LENGTH ~ 0.8 mile | TRAIL DIFFICULTY

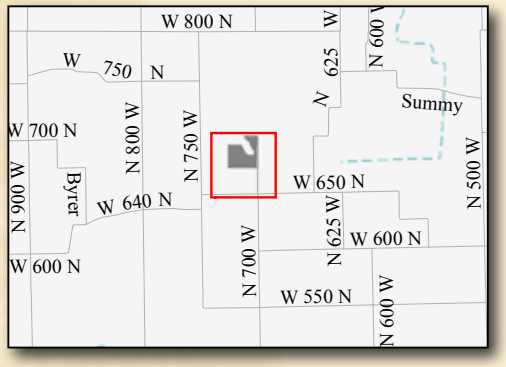
KOSCIUSKO

Latitude: 41˚ 19' 34"N Longitude: 85˚ 58' 50"W



Shiny Club Moss

Acreage: 36.7
Year Acquired: 2003

Glennwood contains a circum-neutral bog, one of only fifteen in Indiana. The bog once was a lake, but it is now nearly filled with a springy mat of mosses, ferns and sedges resting on a bed of peat. Poison sumac, pin oaks, willows and red maple surround the bog area. In the forest around the bog grow Canadian mayflower, shiny club moss, sarsaparilla, and cinnamon, crested shield and royal ferns. The preserve is noted for spectacular fall color.


Directions:
From Warsaw, take SR 15 north to US 30 and then travel west on US 30 for 6.5 miles to 700W. Turn right (north) onto 700W and travel 4.2 miles to its end at 650N. Preserve entrance is straight ahead on the north side of 650N.
